Do not pressurize, cut weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition; containers may explode and cause injury or death.

### 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

**Engineering Controls:  
Protective Equipment:**

**VENTILATION:** Provide general or local exhaust systems to maintain airborne concentrations below OSHA PELs. Local exhaust ventilation is preferred because it prevents contaminant dispersion into work area by controlling it at its source.

**RESPIRATORY PROTECTION:** Seek professional advice prior to respiratory selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear NIOSH/OSHA approved respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen.

**PROTECTIVE CLOTHING/EQUIPMENT:** Wear protective gloves and boots to prevent prolonged skin contact. Wear protective goggles per OSHA eye and face protection regulations (29 CFR 1910.133).

**CONTAMINATED EQUIPMENT:** Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your work shoes and clean personal protective equipment.
